Subject: 2025 budget

Good evening,

I would like you to please consider having the BOE significantly reduce their budget. The town already has made reductions and already submitted a very lean budget. The BOE has to understand that the support that covid funds provided, is no longer available. And as unfortunate as it may be, jobs that were supported with those monies were the last to be added and should be the first to go. This year is not the year to hire a bunch of “wish-we-had” positions; at least not until revaluation tax increases are known. I wholeheartedly support education, but since Covid, spending has been exceptionally generous with no return on monies spent. The kids are getting less and less capable and teachers are getting lazier and lazier. Not all and every, but there certainly has been a significant downward turn. I can not support the budget as it stands. The mill increase should be a fraction of one, not almost 2.

Thank you,
Christine krupansky
