

Good morning,

With the new billing structure for water I feel there needs to be a discussion had in regard to town accounts. Prior, town water bills were only billed for the amount of water they used. They did not pay a minimum amount. With the new rate structure, town accounts are being charged the \$200.00 commercial base rate plus the amount of water used. Is it the intention of the WPCA to continue to keep the same billing structure for town accounts where they are only billed for usage or do departments need to restructure their budgets to account for an additional \$2,400.00 a year per water meter that they have? I feel that the answer to this question is out of my league and I am being asked. Thanks!
