Subject: Blasting at Mt. Decatur

Hello, I would like to voice my opinion on the MT. Decatur issue. I live on military Hwy. in Gales Ferry and grew up in town. I am currently working on a construction project in Rhode Island which is adjacent to two rock/quarry mining yards. The amount of dust (which contains silica) that is generated from the blasting mining process in these pits is horrendous. I am sure at some point they assured the residents in this town there would not be any detrimental effects from their mining activities, but that is definitely not the case. Approving the application for mining Mt. Decatur would be a HUGE mistake, especially with the residential and scholastic properties near the proposed site.

Sincerely,

Chris Turner
Project Superintendent
