Subject: GFI Intermodal question
Date: Thursday, December 12, 2024 6:04:15 PM

A couple more questions:

What is the particulate matter generated per year - across the site across various activities- expected to be based on the current application?

Has the applicant addressed conditions and plans pertaining to existing AMSTY structures - buildings, tanks and utilities etc - in detail as it pertains to current application, uses and activity proposed in the application?

Respectfully submitted,
Beth Ribe
