Subject: Solar

Dear Councilors,

I am definitely in support of a solar farm in town. I have been wondering for a while why Ledyard does not have solar. There are whole countries that are completely eliminating the need to rely on traditional means of electrical production. I would also like to expand things from a small solar farm to putting them on roofs, parking lots, playground shelters etc. Doing this will help us in so many ways.

I have also been wondering what happened to the electric car chargers that were supposed to be put in before COVID. It was one of the reasons I went to a plugin hybrid and I was disappointed when the charging never came to fruition. Can we actually put one in?
