Yes we will request a bid waiver for this project. Brandon Mattis from Oak Hill Controls is our SCADA integrator and intimate with our system. It will save time and money to have Brandon complete this work. Would like to have him get started soon ordering parts and building the panel. The existing parts are no longer available for this panel. If this panel goes down we will not be able to run the rotary drum thickener. This would result in a significant increase in solids removal costs. Contact me if you have any other questions. Respectfully, Steve B. (Ledyard WPCA)

**Subject:** FW: RDT Rework Control Panel

Steve,

We will get this on the agenda for the next finance meeting, a couple of questions:

- Will this work be conducted by a vendor that is currently working up there?
- This is past the bid threshold, will you be looking for a bid waver
- I believe from our conversation this item is extremely outdated and under powered and if it fails it may take some time to repair or replace it on an emergency basis.

Roxanne: please place this on the agenda for the next finance meeting.

Tony

**Subject:** Fw: RDT Rework Control Panel

This is the revised quote for Rotary Drum Thickener panel at the Highlands Wastewater WWTF. This is a priority as the this equipment is obsolete. Can we move this up on the ARPA funding list? Respectfully, Steve B. (Ledyard WPCA)

You don't often get email from [slarrison@oakhillcontrols.com](mailto:slarrison@oakhillcontrols.com). [Learn why this is important](#)

Hi Steven,

Please see attached for revised proposal for the RDT rebuild.

Only went up just a little bit from last year.

Have a great day,

Scott

Thank you, Have a great day!

**Subject:** RDT Rework Control Panel

Hi Steve,

Attached is the quote for the rebuild of your existing RDT control panel. Please read carefully as the main quote is using an Automation Direct 15" HMI, I did include the option to go with the Allen Bradley 10". Please feel free to call if you have any questions.
