Subject: Proposal for Engineering Services for Lead and Copper Rule Compliance

Dear Mr. Lynch, Mr. Bonin, and Mayor Allyn,

Arcadis is excited to partner with the Town on Lead and Copper compliance. Enclosed please find a draft Engineering Agreement for engineering services related to Lead and Copper Rule (LCRR) Compliance for the Town of Ledyard. All work included in this contract is expected to be conducted in 2026 in anticipation of the November 2027 Lead and Copper Rule Improvements (LCRI) compliance dates. The goal of the first phase of this program is to review the Town's available records to determine if it is possible to consider the Town of Ledyard as a "Non-Lead" community ahead of the November 1, 2027 waiver deadline.

This contract includes: program management, review of the Town's existing historical information and records, a comprehensive lead service line inventory update, development of a non-lead action plan, and development and implementation of a public outreach program. This contract does not include engineering services related to development and implementation of a school and childcare sampling program, LCRR compliance sampling, or corrosion control evaluations. It also does not include the work to provide verification of the non-lead status.

Please let us know of any questions regarding the enclosed. I can be reached at 781 213 4923 to discuss. Thank you for this opportunity.

Sincerely,
Arcadis U.S., Inc.

Jennifer Kelly Lachmayr, PE, BCEE
Senior Vice President

Town of Ledyard
