

- Did the sound study include the clearing the trees, removal of stumps, chipping of the lumber?
- Who marked up the 1963 and 1975 Regulations as submitted by Eric Treaster at the end of his narrative from 12/5? Do we have a later set of regulations from around that time that shows the omission?
- In regards to radon exposure, does depth matter? I.e. do we encounter more radon at deeper levels within the bedrock and layers?
- Maine Drilling and Blasting response to letter read from Lara Stauning from the 12/5 meeting: Is there a report to corroborate their comments in regards to vibration levels? Does this report come from monitoring equipmen?
- How many barges departed and arrived during Dow's heyday?
- How many barges are expected/anticipated to arrive and depart at GFI over the course of 10 yrs?
- How is it possible that 100% of silica dust can be prevented from leaving the boundaries of the property?
- Please demonstrate in detail and in laymen's perspective the final grading depiction resulting from the regrading processes in this application. Please include the part of the property that extends from Route 12 and down to the Thames River. Please use existing plans as necessary and any other means to clearly show the resulting gradation.
- Please describe or reiterate in detail the closure plan for each phase, including timing and timelines.
- Processing of rock and regrading as proposed is characterized as "industrial site preparation. Have other permits including site plans been submitted for either this application or under a separate application?
-
- Please describe how "blasting" and "rock crushing" and "rock shot" is deemed either as an "Incidental" use or a "Principle" use, in terms of this application.
- Please describe the contents/characteristics of the capped area of the site as identified in the application as a remnant from the Dow era of use.
- Please describe any all progress made on the new mitigated wetlands as previously approved by the IWWC in 2023.

- Please describe/characterize/define the "conditions precedent hereinafter contained" in the agreement between the Historic Preservation. If the permanent preservation enacted until "the event that the Owner obtains final, unappealable, approval from all applicable regulatory boards, commissions and agencies of the Town of Ledyard".....Is there really an agreement between Owner and SHPO? What purpose does this document serve?
