

5 REASONS TO COMPOST WITH BLUE EARTH

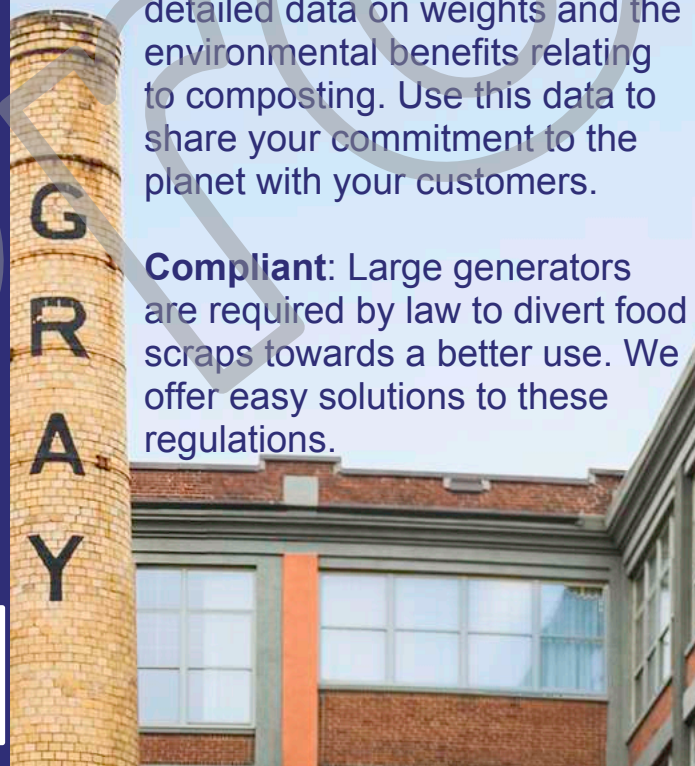

Cost Effective: You have to pay to incinerate your food scraps. Instead, choose us and know you are doing the right thing with your money.

Clean: We can clean every receptacle we collect. This mitigates any pest or odor issues. If your containers are clean, cool, and covered, you'll never have a problem.

Convenient: Our containers are portable and have flip-top lids. You can bring your containers right inside and fill them where the scraps are created.

Marketable: We provide detailed data on weights and the environmental benefits relating to composting. Use this data to share your commitment to the planet with your customers.

Compliant: Large generators are required by law to divert food scraps towards a better use. We offer easy solutions to these regulations.

THE NUTS AND BOLTS

Our team is dedicated to finding unique and creative solutions that will improve your operations and add value to your organization.

We service:

WHO WE ARE

Blue Earth Compost is a food scrap collection service for homes, businesses, and events. Founded in 2013 with a mission to expand composting in CT, we've collected millions of pounds of food to make compost and energy too!

40% of the food grown in the United States is wasted. In fact, it is the number one material sent to landfills and incinerators. We believe these food scraps are not waste, but a valuable resource that should be returned to our food system.

Join our movement for a sustainable future. Got scraps? Make soil!
