Bill, the small animal lab at LHS Agricultural Science is looking for some cages for birds, reptiles and small mammals. We issued a bid and I called and or emailed as many vendors as possible but we received zero bids. I am looking for a waiver to purchase from Marineland the units. The total price is \$32,590 One of the issues is that the space is limited and Marineland is the only vendor the school could find that had units that would get through the doors and be short enough to fit under the ceiling.
