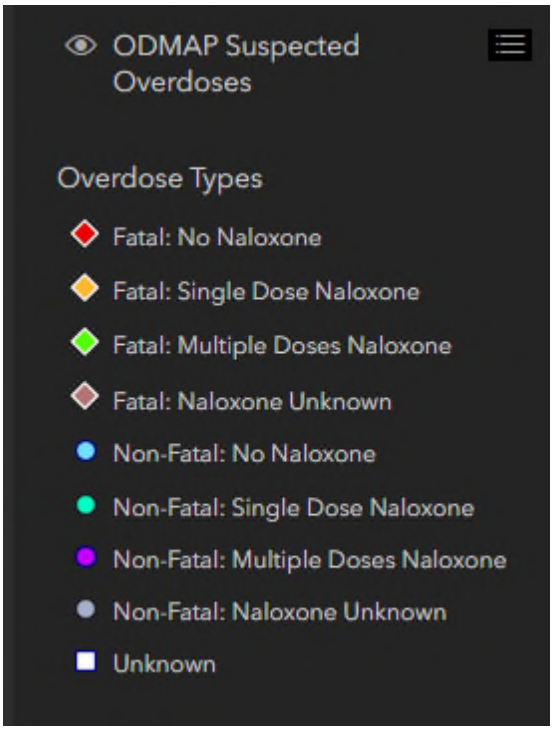
Subject: RE: Ledyard Prevention Coalition - Overdoses in Ledyard

Good Morning,

Attached is the legend that explains the color of the dots. The red diamond is a fatal overdose. I have reached out to my colleague who created the maps and I will get back to you with the rest of the answers to your questions once I hear from her.



Thanks!
Kerensa

Subject: RE: Ledyard Prevention Coalition - Overdoses in Ledyard

Good Morning Kerenza:

Thank you for sending the map of overdoses in Ledyard.

Could you provide some additional information:

- Meaning of the color of the dots and the red diamond.
- Clarify the timeframe - You note 2023 to present – Is that all of 2023 and first two months of 2024?
- Does one dot count as one overdose - I do not see in your message below how many overdoses the maps represent.
- Do you have data as to whether the overdose was accidental or intentional.

Thanks so Much,
Roxanne
