Good afternoon,

I did not approve a B100a for this property for the change of use.

Best,

I will be out of the office October 6 - 10

Odalys Reyes Morales

Good afternoon, Odalys, Would you please confirm that the property owner had an approved B100a when he reconnected to the existing well on the property last week? Thanks!

Good afternoon,

There is nothing in the code that requires the garage to have water in this building for the proposed business.

If they do not connect to water and want to propose using porta potties, that would be allowed. But if they connect to public water or existing well then, a change of use B100a will be required for approval.

Best,

I will be out of the office September 10, 25, & 26

Hi Odalys, I am particularly interested in your comments regarding this application. 750 CLH is developed with a single-family home on one side of the property and old repair garage on the other. It is basically "divided" in half use-wise. The current use proposed is for a landscaping company with small equipment rentals. I have been advised by the tenant and landscape company owner, Ryan Forrestt that there is no water connected to the building, but that "there will be," i.e. he's going to reconnect the pipe from the existing well, I assume. I confirmed with GPU that public water is available, but the property is not connected. Any thoughts? Can I recommend to the PZC approval with the condition that the water be connected prior to occupancy of the building? Please let me know. I've copied Peter Gardner on this email as he is assisting Mr. Forrestt with his site plan application. Thanks!
