Steve,

The R22 truck replacement committee has voted on and selected the following apparatus for purchase (see attached documents). We would like to start the legislative process with the town to secure and sign for this build.

It is on the Houston/Galveston Purchase System so we are hoping that will ease the purchase process with the town. The amount is \$320,479.60. which we acknowledge is above the allotted amount that the town has given. I am happy to discuss the details about that. Myself and Acting Chief Engineer Jeff Smith will be present during the legislative process for questions and details about the purchase process. They are currently anticipating a two year build timeline.

Thanks.

Erhart

Chief,

I have attached the current specification sheet for the truck, the quote and the HGAC info. Let me know if you need any further information.

Thanks

Jeff Smith
