Once again, this shot was less than a .02 reading about 100 yards away up at Sprigs and Twigs garage which is directly in-line with her residence which is >1700 yards away.

And what are those specs?

Hi Vivian

As far as I can tell they are doing nothing illegal, all readings thus far have been within specifications.

Thanks

Jim

Dear James -= from my attendance at hearings related to proposed blasting at Mount Decatur, I learned that it is against zoning regulation, and possibly illegal, to cause vibration from blasting rock that can be detected by homeowners nearby.

Only moments ago, blasting on Baldwin Hill Road severely affected me and my home. I am frankly fed up with this and would like it to stop.

Thank you very much.
