11/28/23 DEEP GFI notification.

This "application" is identified as "rock regrading" only. It does not identify the quarrying operation that is intended to go on for 8 or more years, with blasting, rock crushing, and likely runoff of toxic quarry dust into the river. The rock regrading will produce cliffs and level spaces between them that no future imaginary, identified or committed industry would construct a building.

Sincerely, Jim Gauld

Good morning, Jim, Your email has been received, marked as an exhibit, and will be posted to the Town website. Also, attached please find exhibits 137-1 to 137-4 regarding referrals to DEEP re NDDDB and its responses. I have copied Ms. Fontana at the email address provided in your email below so as to ascertain if any further review is needed. Please contact me with any questions. Thanks.

Regards,

Liz Burdick

Subject: Additional info re GFI application.

Dear miss Burdick,

Section 11.6.10 of town regulations, titled **Notification of DEEP:** states that If any portion of the property which is the subject of an application within an area designated as "State and

Federal Listed Species & Significant Natural Communities"on the most current Natural Diversity Data Base Areas map for Ledyard prepared By DEEP, the applicant must notify DEEP of the application. **This is within such an area.**

A report from DEEP shall be required for any application for Site Plan approval or a Zoning Permit for any such property, and any such application submitted without a DEEP report shall be considered incomplete.

According to Ms Camille Fontana@ct.gov, as of Oct. 17 Cashman has **NOT** submitted an application for their proposal for quarry work or excavation work (same thing). Cashman did submit an application and received permission in April, 2024 for their pier work at the marine terminal.

Please add this to Exhibit #136 or make it an additional exhibit.

Thank you, Jim Gauld
