

Attached: POCD page 53 Reference to Historic District Commission “more active action”

4. Promote Gales Ferry Historic District Actions in 1992 (Historic District #1: <https://catalog.archives.gov/id/132353528>) and 2005 (<https://catalog.archives.gov/id/132353530>) created a National Register Historic District in significant parts of Gales Ferry Village. However, this district receives little attention and there is a profound lack of awareness of the state and extent of the district as well as local regulations governing this district. These districts include >70 contributing properties and represent a significant asset for the town. The existence of this important town resource should be promoted and protected through more active action from the Historic District Commission to promote and ensure long-term preservation of the structures and character of the district.
