---

Liz,

Attached is a list of four recommendations to the revised application gleaned from the August 8 hearing that the Commission should consider during its deliberations.

The list should be assigned an exhibit number and added to the record. I will reference the recommendations when the public hearing resumes on August 22.

The recommendations should also be provided to the consultant to support his technical review of the application.

You are welcome to call me if you have any questions.

Please confirm receipt.

Thanks,

Eric
