**RE: Traffic Impact Statement
Proposed Residential Subdivision
Seabury Avenue and Silas Dean Road
Ledyard, CT
Our File: 24056**

Dear Mr. Rice:

Pursuant to your request our office has prepared this statement outlining the potential traffic generation and potential impact of a proposed 24 lot residential subdivision proposed for property located on Seabury Avenue in the Town of Ledyard, CT. The site location with respect to the surrounding roadway network is presented in Figure 1. This letter presents our findings.

The site proposed for development is currently an undeveloped parcel with single family residential to the north and west, and undeveloped property to the south and east. The current proposal is to combine three existing lots into a single parcel and then to subdivide the property into 24 single family lots. Access to the property is proposed by way of a single driveway to the existing cul-de-sac at the end of Seabury Avenue.

Trip generation estimates were made for the proposed development utilizing the ITE *Trip Generation* Report, 11th Edition. Included in the *Trip Generation* database is Land Use Code (LUC): 210 – Single-Family Detached Housing. With a total of 24 units (subdivision lots) the proposed development has a trip generation potential of 271 trips daily, with a morning peak hour volume of 20 trips and an afternoon peak hour volume of 26 trips. The *Trip Generation* worksheets are included in the appendix. The trip generation is summarized in Table 1.

Traffic to and from the development would access Spicer Hill Road via Seabury Avenue. Most traffic is likely to utilize Route 117 and or Route 214 to access the employment centers in

Norwich, Groton and at Foxwoods. It is likely that no more than 75% of the site traffic would utilize any one section of roadway, other than Seabury Avenue. That would limit the impact to 20 vehicles on any roadway or intersection.

A review of recent ConnDOT traffic volume data indicates counts on Route 117 north of Church Hill Road, on Route 214 northeast of Spicer Hill Road and on Church Hill Road northeast of Spicer Hill Road. Copies of the ConnDOT counts are included in the appendix. The counts are summarized in the table below.

Location	ADT	AM Peak	PM Peak
Rt 117 N of Church Hill Rd	3,000	181	283
Rt 214 NE of Spicer Hill Rd	3,800	251	356
Church Hill Rd NE of Spicer Hill Rd	1,800	197	286

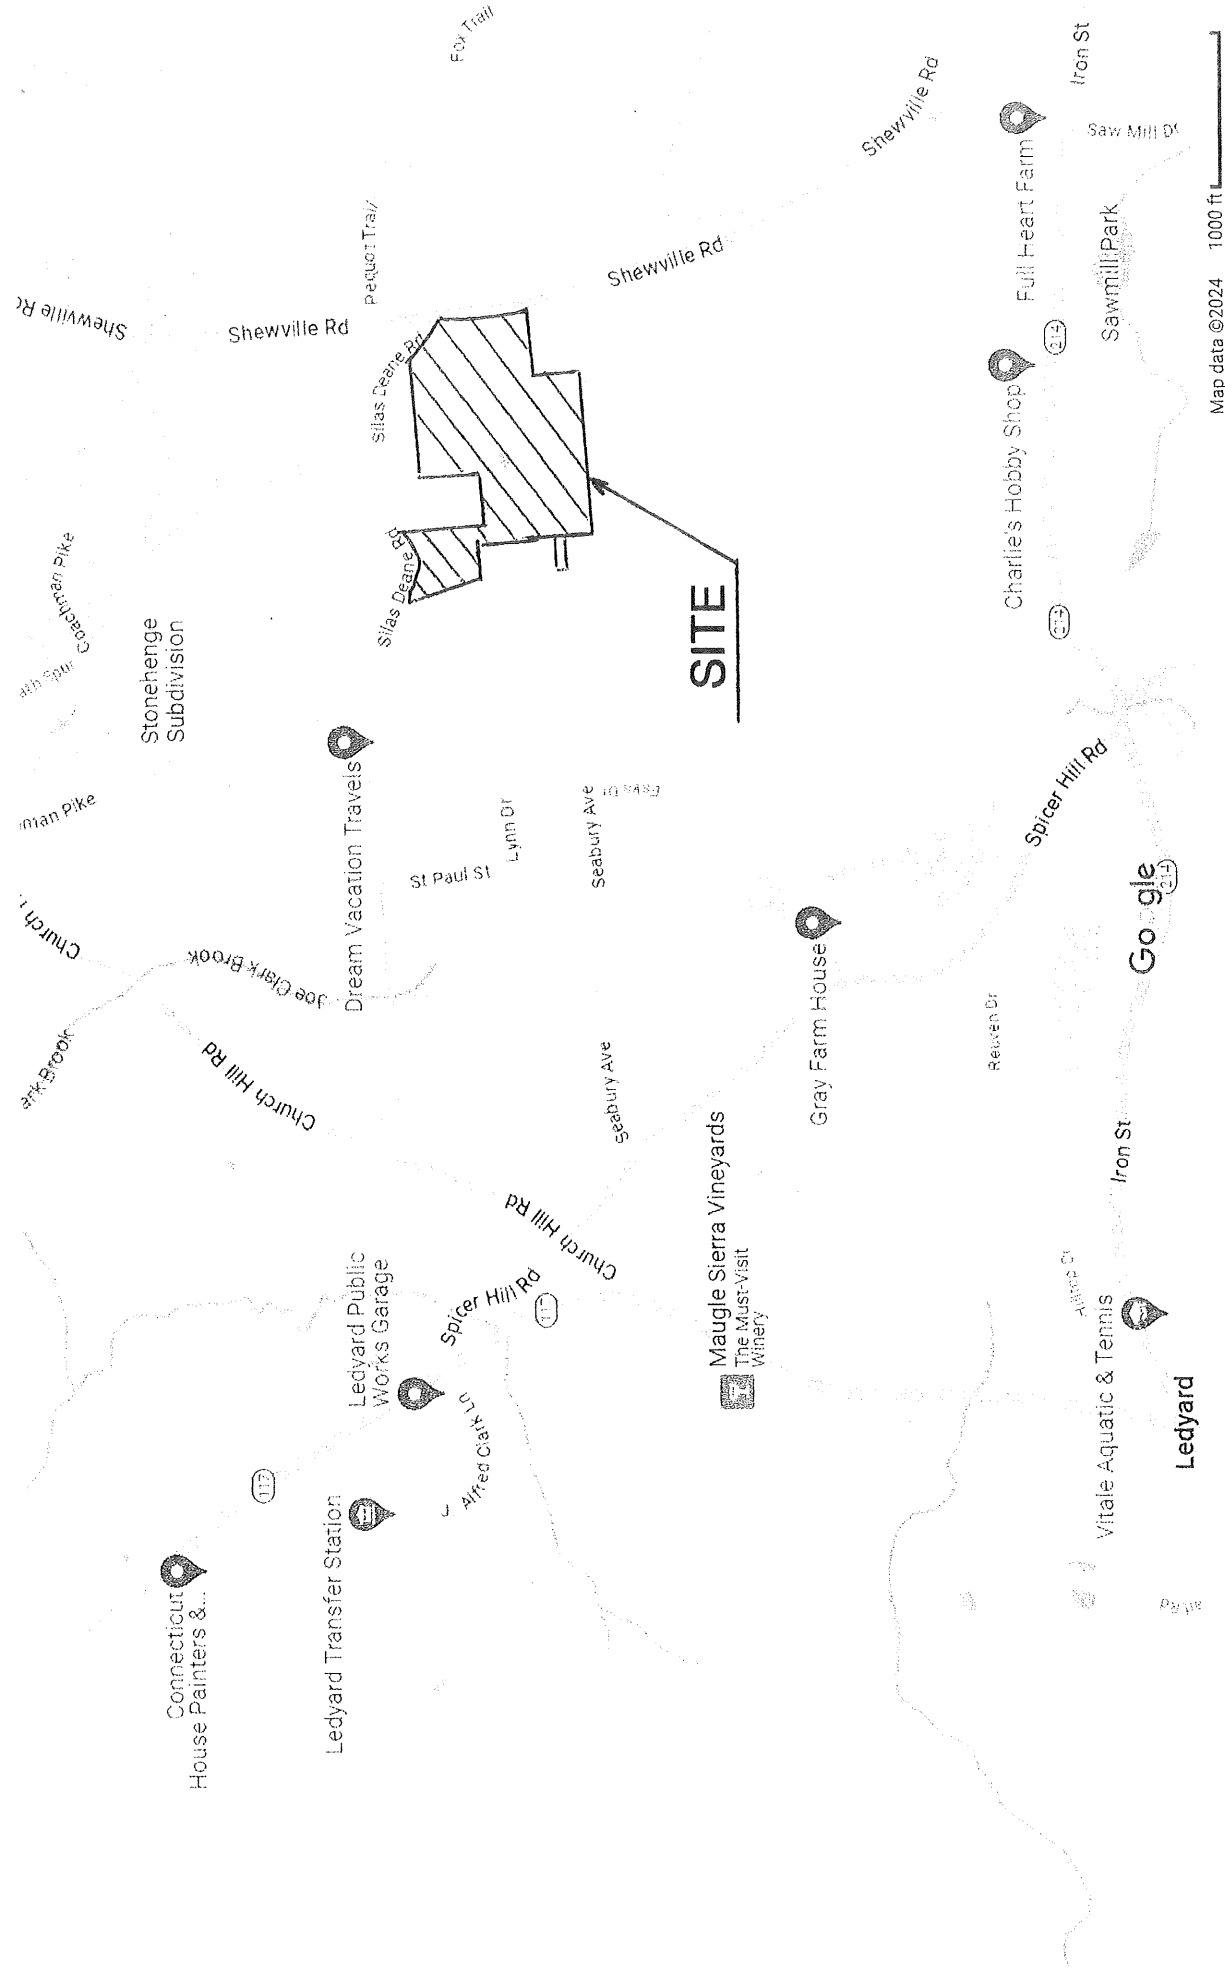

Counts were not available from the DOT for either Seabury Avenue, Speer Hill Road, or Silas Deane Road.

Based on the ConnDOT counts and the relatively low volume of site generated traffic it is my professional opinion that the local roadway network will not be significantly impacted by the traffic volumes associated with the proposed development.

We appreciate the opportunity to provide this information to you. If you require any additional information, please do not hesitate to contact our office. A representative from our office will be available to present testimony before local commission upon your request.

Very truly yours,
F. A. Hesketh & Associates, Inc.

Scott F. Hesketh, P. E.
Manager of Transportation Engineering
