Why is Preston removing food scraps from municipal waste?

Food scraps make up about 22% of trash. By sending these valuable materials to compost, rather than incineration we can improve our air, soil and water.

Food Scraps are NOT Trash. Food can be converted into compost. Compost improves soil quality for plant growth, reduces the need for chemical fertilizers, helps to retain water in the soil and reduces soil erosion. Putting food scraps into a landfill creates methane, a greenhouse gas which contributes to climate change. The Quantum BioPower anaerobic digester in Southington is able to use the methane to create renewable energy while also making compost.

You can help! The more Preston residents that participate in this program, the more pounds we will remove from the municipal waste stream. We hope to see this program grow with more and more bins being filled. **Transfer Station stickers are available at the Transfer Station with proof of residency.**

THANK YOU for participating in Preston's Food Scrap Composting Program!

For more information visit:

<https://www.preston-ct.org> or call (860) 887-5581

IT'S SO EASY!

1. **Collect** your food scraps in a BPI Certified compostable bag or a container of your choosing. If using a bag, when full, close off the bag by tying a knot at the open end. Please don't use twist ties or rubber bands.
2. **Bring** your food scraps to the Transfer Station at 108 Ross Road and dump them into the larger bins supplied by Blue Earth Compost. It's important to completely fill one bin before moving on to the next.
3. **Repeat!** You can go to the Transfer Station at any point during operating hours. They are:

☒ Friday and Saturday - 8AM-4:15PM

All food scraps will be picked up by Blue Earth Compost and composted at an anaerobic digestion facility in Southington, CT. They'll be turned into nutrient rich soil and renewable energy!

Starter kits are available for the first 100 residents to sign up and can be claimed by visiting the Transfer Station.

The starter kits include:

- 6 gallon transport bin &
- 1 roll of 25 compostable bags for the counter top bin

You can use any bins that you like, but these are available. PLEASE NO PLASTIC BAGS. ONLY BPI CERTIFIED COMPOSTABLE (NOT BIODEGRADABLE) BAGS ARE ALLOWED.
